

WORKSHOP: MAGNETIC SEIZURE THERAPY (MST)*

Research Fundamentals and Applications

MagVenture will host a workshop as part of the program at the 6th International Brain Stimulation Conference in Japan in February.

Come listen to some of the top pioneers within the newest research in MST*: Prof. André Brunoni, Prof. Jijun Wang and Prof. Fumitoshi Kodaka.

3 hours of overviews, newest clinical research results and a panel debate on the future of Convulsion Treatment with Magnetic Seizure Therapy (MST)*.

Ask questions and see live the MST* research system – the MagPro XP Black Edition (MST), the most powerful, advanced, and tailored system for the application of MST.
